Sounds good to check in first – would Friday around 3:30 EST work? (or 4-5).

Hi Carol, Thank you for your patience as we identified the right colleagues from Google to pull into this effort. Would it be possible to schedule a call for later this week to learn more about how the CDC and Census envision working together on this important topic?

Maybe on Friday? Please let us know when is best for you and we can pull in the right people from our team.

Thank you,
Jan

Stanley/Jan—As I believe we discussed previously, CDC is now working with Census to leverage some of their infrastructure to help identify and address COVID vaccine mis-info. As I understand it from the Census team.... when they were doing this for the Census project last year, they meet regularly with a Google/YouTube Trust team. Is it possible for us to start up regular meetings on this topic or maybe use our existing meeting time. Let me know if you want to discuss in more depth.

I'm still checking on the treatment issue.
